## EDUCATION

### Certificate in Full-Stack Web Development | CareerFoundry

March 2023 - February 2024

- Intense project training program focused on Javascript, HTML, CSS and most popular libraries, frameworks and tools.
- 500+ hours of hands-on training with guidance of industry leading professionals.

## PROJECTS

### MyFlix

#### Personal project, CareerFoundry, March - November 4, 2023

- Created a non-relational database (MongoDB) to store various types of user data.
- Built a REST API with Node.js and Express, using Mongoose to interact with the database.
- Tested the API endpoints with Postman, wrote clean documentation and deployed to Heroku.
- Created two single page responsive front end applications, one with React and the other with Angular. With both frameworks used front end libraries like Material UI from google to style.

## EXPERIENCE

### Wells Fargo, Arizona — *Technology Operations Analyst*

June 2022 - Current

- Addressed technical issues for fellow Wells Fargo employees.
- Collaborated with management and colleagues to adhere to security protocols, preventing breaches.
- Ensured seamless performance of Wells Fargo's mortgage and support teams by minimizing downtime caused by system issues.

## PROFILE

Web developer with a foundation in customer service. Proficient in Javascript, CSS and HTML. Enjoys tackling intellectually challenging tasks and crafting user-centered solutions to problems. Has a keen enthusiasm for continuous learning and staying updated on new skills and technologies to drive consistent improvement.
